

## Press Release

August 1, 2016

### Opening Australia Branch “Eirich Australia”

Nippon Eirich Co., Ltd., [HQ: Nagoya, Aichi / Representative Director & President: Stephan Eirich, hereinafter referred to as “NE”] will open a branch in Brisbane to expand its structure of customer support in Australia in August 2016.

Australia is a major country for metallurgical mining with the potential to be a global resource-supplying country. Regardless of the present economic situation, the growth is expected to continue. The market potential for Eirich TowerMill Technology will continue to expand.

We have been conducting sales activity through Joest Australia Pty. Ltd, which is the appointed agent in Australia.

Since we have been receiving more and more requests related to technical and consulting issues from the clients, Nippon Eirich is responding quickly by establishing a new subsidiary for technical support including also testing facilities.

Therefore, we decided to establish a branch, which also works as a test center in Australia.

Joest Australia Pty. Ltd will continue to act as appointed agent for Eirich Tower Mills in Australia.

Eirich Australia will allow expanding customer orientation including not only marketing and sales activity but also testing, evaluating and consulting.
